

Elena

America is Facing a big Problem.

Sodas are making People become over weight. This is very unhealthy and we need to stop!

One reason Mayor Bloomberg has ban Sodas larger then 16 ounces is because Populer menus are Much bigger now then it was back then. For example in 1955 the Size Soda at resteraunts was 7 ounces and now you can but a Soda that's more than 30 ounces and this is **very** unhealthy!

Another Reason is exSPerts say that to many sodas can lead to obesity and obesity you dont want to get obesity because obesity is heart troble and diabetes so be carful!

No More "Supersize"
drinks! Please don't be mad. This is the right choice. Say good bye to Supersize drinks.

I would like more non-fiction books in our classroom library.

One reason is because it can help us think of characters for our fairy tails for example

I researched octopuses last year and I made a book call the tree little crabs and I made the octopus bad because octopus eat crabs and other shellfish.

Another reason is I love to research animals like Dinosaurs and other prehistoric creatures like the smelodon and other ice age animals for example when I study rhinos I said rhinos have been living

since the ice age.

One last reason is it helps us get smarter for example I used to not know about rhinos now I know alot about rhinos.

I hope you agree to this argument about getting more non-fictchin books.
